

# Maximize your Fog, Snow and Bubble Distribution

The Swivel Bracket is the ultimate accessory for maximizing the distribution of different effects, including fog, snow or bubbles. With a rotational swing up to 90 degrees paired with a maximum speed of 8 rpms, The Swivel Bracket provides optimal coverage for any stage or venue.

The Swivel Bracket comes equipped with DMX/RDM capabilities and a built in DMX LED Display for ease of use. Manufactured with a load capacity of 100lb/45kg and dual hanging mounts that can be fastened onto any truss rigging in a hanging or inverted position, The Swivel Bracket will safely and securely provide coverage for your venue of any effect. With power supplied from a Neutrik Powercon, able to operate from 110-230v, and with an auxiliary power outlet up to 8 Amps, The Swivel Bracket offers great versatility of use.

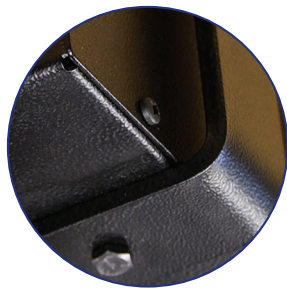

*The Swivel Bracket can be paired with our machines for concerts, theatre performances and other live events maximizing the distribution of their respective atmospheric effect.*
