

A Fan that's Small but Mighty

VERSA FAN™

Versatile, small and powerful best describes our Versa Fan. It is a compact, heavy-duty fan that is compatible with haze, fog, snow and bubble machines, evenly distributing the special effects across the stage. The unique design makes the fan user-friendly and very portable.

The Versa Fan comes with a built-in variable speed control but can also be controlled by an optional DMX interface. Another key feature is its built-in ratchet system, which offers multiple positioning options and a positive locking positioning base for quick and easy use.

Ideal for distributing fog, snow and bubbles for television, live theatre and concert events.

On queue, the Versa Fan can push the effect where you need it, when you need it.
