

Our Most Portable Fog Machine

The Ultra Handy Fogger is Ultratec's latest addition to its award-winning fog machine lineup. This handheld, portable unit is incredibly quiet, and while it has a small footprint, it's big on fog effect. With an initial warm up time of only ten minutes, its precision flow response allows you to control the amount of fog output with the manual pump.

Its 1000-watt heater lasts 20 minutes, with the capability to reheat in eight minutes or less due to the high mass block on the heat exchanger, designed to store additional heat. The model comes with a 1.5L (.5 gallon) fluid tank.

This product was designed as a portable fog machine where temporary fog is needed such as being on the set of a film/TV or photography.
