Dramatic Fog Effect for Confined Spaces

POWER FOG
– INDUSTRIAL –
-9D-

The Ultratec Power Fog Industrial 9D Fog Machine was created to eliminate the challenges of installing fog effects under stages or in close and confined spaces. Designed for ease-of-use, the machine comes standard with 5-pin DMX control, manual remote control or remote show control.

Built with our 1400-watt Heat Exchanger, the machine is rotated 90 degrees in the stainless-steel chassis to stand upright. Rubber feet and plastic glides are already affixed to the machine to offer the utmost stability. The unit is also used extensively in Low Smoke Generators to decrease the size and allow for greater flexibility.

This fog machine is suitable for situations where continuous output is required over longer durations. Live event environments such as haunted houses, laser tag arenas, and recreational spaces like Escape Rooms are perfect venues for this model. Combined with the Mega Fog Burst attachment, sudden fog effects can be created on cue, adding to its versatility.
