

The Radiance Arena System. Touring Just Got Better.

The Radiance Hazer can cost less than \$1 per hour to operate.

The Radiance Arena System is our latest hazer touring system for events in large arenas. Packaged in a durable wheeled road case, it includes the Radiance Hazer with its award winning 4-Port Rapid Vaporizer. It's a major advancement in water-based haze technology.

Complete hazer and fan control is achieved via four DMX channels. Hidden in the base, the fan tray slides smoothly into position, giving the road case full support via the fifth wheel. The TwisterX Fan rotates 180 degrees providing wide haze dispersion in forward direction and focused dispersion in reverse direction. This system will push haze up to 1,500 cubic feet per minute.

Luminous 7 Haze Fluid should be used with the Radiance Arena System. With an extremely long hang time, it produces a beautiful haze and using it maintains your five-year warranty against manufacturer's defect.
