

Make Lasting Impressions with Low-Lying Fog Effects

The Dry Icer is a new and improved professional, cost effective solution for creating spectacular low-lying fog effects when a shorter run time is sufficient. Its sleek new design is compact, portable, lightweight, and built with a durable corrosion resistant polyethylene material for effortless use.

With a 20 lb (10 kg) dry ice capacity contained in a stainless-steel basket, the Dry Icer features a 5-gallon (20 litre) unit equipped with a 1,500-watt element to heat the water. Utilizing our 3-step pivoting ratchet system, the basket eases into the boiling water creating a continuous thick, low-lying fog for approximately 5 minutes.

Ideal for our theatrical, educational and small event customers who require a manually operated single cue of low fog. You can see our Dry Icer being used in small theatres, schools, weddings and corporate events.
