

# Create Big Reveals with the Fog Curtain

The Fog Curtain is designed to be used in conjunction with one of our low fog systems (low fog generator and a fog machine) such as the Eclipse. The combination of these machines can create a dramatic waterfall effect, sending fog cascading to the stage.

The liquid CO2 conditioned fog effect can fall from heights of up to 30 feet. Depending on the number of low fog systems used, the length of the curtain is almost limitless. A single low fog system will create a near 20-foot length of fog curtain. This effect has been successfully utilized on cruise ships, casinos, theme parks and stages around the world.

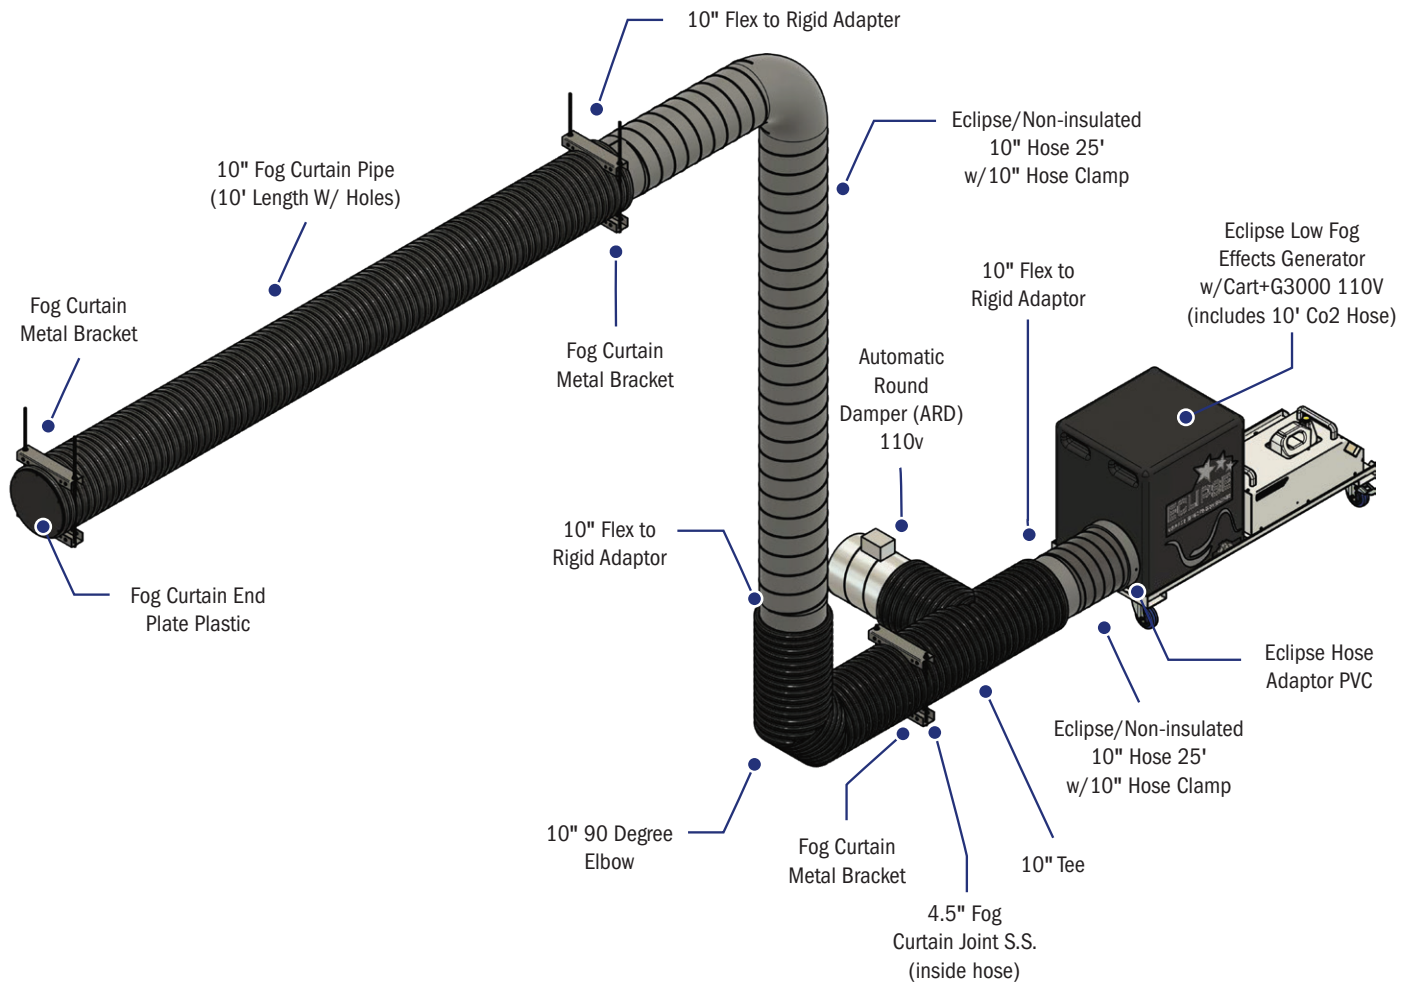

*The Fog Curtain is ideal for everything from big reveals to a subtle disappearance on stage for people, scenery, and props. It can also be used as a projection screen to create a unique, dramatic visual heightening the mood of any live performance.*
